THE CIVITAS INITIATIVE IS CO-FINANCED BY
THE EUROPEAN UNION

Planning for low-carbon cities

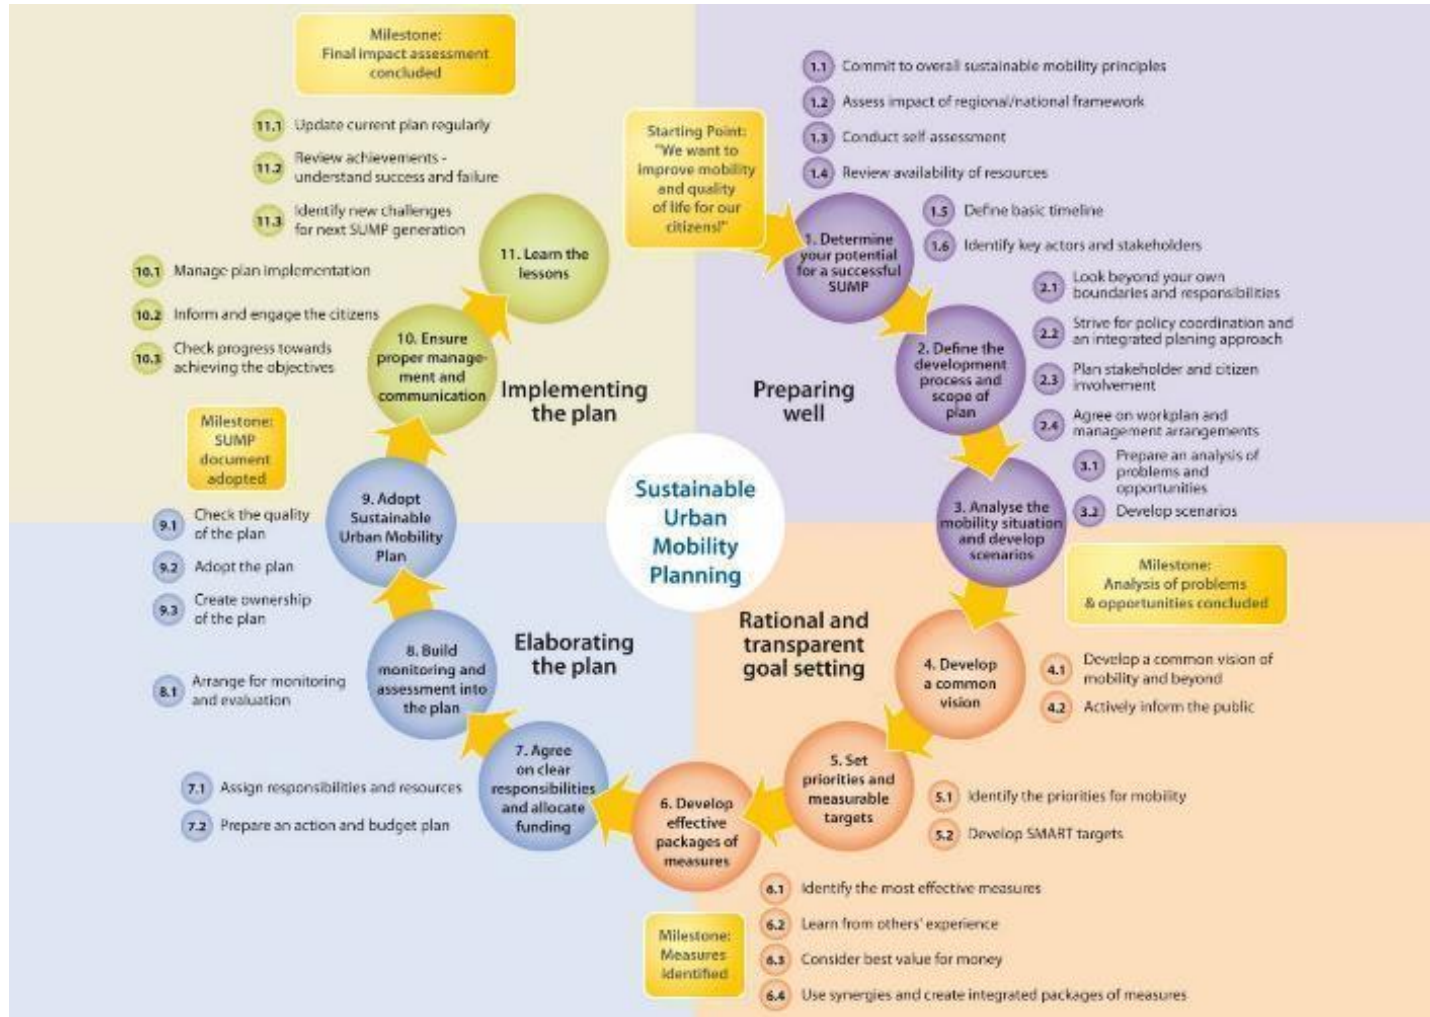

- Urban mobility is a **key area** in climate change
 - many **functions of mobility** (e.g. access, inclusion, health, space, commerce)
 - strong **opinions of citizens** and other stakeholders
 - complex **institutional organisation**
- How to bring together **different expectations and challenges** and initiate the **long-term change process** (also supporting decarbonisation)?

What is a Sustainable Mobility Plan (SUMP)?

- The **Transport Planning Concept** of the European Union since 2013,
- developed in a **consultation process** with experts from all over Europe,
- **strategic planning** document for cities and metropolitan regions,
- supports the required **change process** in urban mobility,
- rich **knowledge base** and **community**,
- take-up in cities and metropolitan regions **around the world**,
- **updated version** planned for 2019.

The basics of the SUMP Concept!
